The Forgotten Art of Curiosity

**Vikas Surani**

Global Vice President – Growth | TEDx Speaker | IIMA

December 8, 2024

Hello, Curious Minds!

As I reach the 10th edition of *Being Curious*, I've realised how curiosity has been the driving force behind much of my growth. It's more than just a trait—it's a mindset. Here's how curiosity has shaped my journey and how you can make it work for you:

Why Curiosity Matters

Curiosity opens doors to new opportunities and ways of thinking. It helps you challenge assumptions and uncover solutions you might not have seen before. For me, curiosity has allowed me to move from being focused on individual tasks to empowering others—sometimes stepping back to help others move forward brings the greatest growth.

Curiosity turns challenges into growth opportunities.

How to Cultivate Curiosity

When we're children, curiosity is second nature. We ask endless "why" and "how" questions, constantly exploring the world around us. But as we get older, the rush of work and responsibilities often dulls that sense of wonder. To reignite curiosity, take a moment each day to pause and reflect, to ask questions that challenge the status quo. It's about carving out time to let your mind wander and explore new possibilities.

Reconnect with your inner child's curiosity—make time to wonder, ask, and explore.

What Does Curiosity Look Like in Action?

Curiosity is about exploring and experimenting. When faced with a challenge, rather than jumping to conclusions, take a step back and ask yourself, "What's really going on here?" That's when new solutions often appear.

Don't rush to solutions—use curiosity to explore deeper.

Curiosity in Action—Every Day

To make curiosity part of your life, set aside time to explore something new or reflect —whether it's reading, having a conversation with someone different, or just thinking about how things work. Curiosity doesn't need to be big, but it does need to be regular.

Start small—curiosity can grow with consistent effort.

Final Thought

Curiosity has led me to places I never imagined. It's the tool I use to innovate, learn, and grow. Make curiosity a part of your daily life—ask questions, challenge norms, and embrace the journey of discovery. Let it guide you.
